

Active Transport Studies

Our experience includes active transport policies and strategies, Pedestrian Access and Mobility Studies (PAMPS), bike plans, footpath and cycleway audits/mapping and facility planning and design, including demand forecasting and project evaluation. Our consultants have developed a thorough understanding of all aspects of the planning, design and implementation of active transport into the integrated transport network. Our expertise in traffic engineering means that the planning and design of pedestrian facilities and cycleways is achieved with an appreciation the needs of modal integration within the streetscape. We make the effort not to generalise when it comes to active transport planning and we consider the different needs of each traveler market.

PAMPS & Pedestrian Audits

- Manly Town Centre PAMP
- Cessnock PAMP
- Top Ryde PAMP
- Central Coast PAMP

Cycling Strategies & Bikeway Design

- Harbour Village North Cycleway Design
- Bondi Junction to City Cycleway Stage 2
- North Brisbane Bikeway User Behavior Analysis
- Central Queensland Cycling Options Analysis

Active Transport Policies & Strategies

- Central Cost Bike Plan
- Northern Beaches Walking Plan
